

Planned Service Changes

Liberty Plaza / Zuccotti Park
Sept. 17 - ongoing

Pass the Buffett Tax on millionaires.

Why should millionaires pay?

1,470 households reported income of more than \$1m in 2009 but paid **zero** federal income tax on it. (source: IRS)

The richest 0.01% (those with incomes above \$8.6m) pay a combined 17.5% in individual income and payroll taxes.

Many middle class families paid much more. (source: CBO)

Between 1983 and 2009, the top 1% gained an average of \$4.5m per household, while the wealth of the bottom 60% actually **decreased** by 7.5% (source: Economic Policy Institute)

Note: Congress now says there's less money
for **education**
for **infrastructure**
for **our entitlements**
for **public workers**
for **our future**
